

## **Problem Statement Project: UofSC Parking Finder**

Authors: Jacob Hammond, Braceland Degenhart, Terrance Butler, Matthew Tieman

### **Problem Statement:**

Students at UofSC need a way to find a parking spot even if they have a parking pass because they don't have the time to waste going through a parking lot just to not have a spot.

### **Who is experiencing the problem?**

Students and potentially some faculty

### **What is the problem?**

It is too difficult to determine if there will be parking within the various parking lots around campus

### **Where does the problem present itself?**

Any student lot within UofSC campus

### **Why does it matter?**

Students could be late or miss class due to there not being enough parking
